

Terms, Expressions and Acronyms (TEA)

Terms, Expressions and Acronyms (TEA) must be organized alphabetically.

<i>TEA</i> (EN)	<i>TEA</i> (PT)	<i>Description</i> (EN)
Aggregate	Agregado	A cluster of domain objects (Entity + Value Objects) treated as a single unit with one Aggregate Root.
Aggregate Root	Raiz de Agregado	The single Entity within an Aggregate that serves as the entry point for all external references.
Aircraft	Aeronave	A specific physical aircraft registered in the system, identified by its Registration Number.
Aircraft Model	Modelo de Aeronave	A generic aircraft design specification (manufacturer + model name) shared by multiple aircraft instances.
Aircraft Status	Estado da Aeronave	Operational state of an aircraft: Active, Inactive, Under Maintenance, or In-flight.
Airport	Aeroporto	A certified facility where flights originate or land, identified by its IATA Code.
Airport Contact	Contacto do Aeroporto	A communication method for an airport, including type (e.g., Phone, Email, Fax), value, and description.
Airport Details	Detalhes do Aeroporto	Descriptive information about an airport: name, city, country, region, and timezone.
Airport Status	Estado do Aeroporto	Operational state of an airport: Operational, Closed, or Under Maintenance.
API	API	Application Programming Interface used for communication between system components.
Checklist	Lista de Verificação	Set of maintenance tasks or verification steps defined within a Maintenance Template.
Completion Notes	Notas de Conclusão	Optional remarks recorded at the end of a maintenance activity, detailing outcomes or observations.
Coordinates	Coordenadas	Geographic location (latitude and longitude) of an airport.
Entity	Entidade	A domain object with a unique identity that persists over time, regardless of attribute changes.
Estimated Flight Time	Tempo de Voo Estimado	Expected duration of travel along a Flight Route, from departure to arrival.
Facility	Instalação	Structured data representing specific airport infrastructures like Terminals, Gates, or Services.

TEA (EN)	TEA (PT)	Description (EN)
Feature	Característica	Specific attribute or capability of an Aircraft Model (e.g., WiFi-enabled, specific engine type).
Fleet	Frota	The complete set of all airplanes managed by an Air Transport Company (ATC).
Flight Route	Rota de Voo	A defined path between two airports (origin and destination), with distance and operational requirements.
Flight Schedule	Horário de Voo	The specific date and time at which a Scheduled Flight is planned to operate.
Flight Status	Estado do Voo	The lifecycle state of a Scheduled Flight: Scheduled, Delayed, In-flight, Completed, or Canceled.
IATA	IATA	International Air Transport Association; the body that defines the 3-letter airport identification codes.
IATA Code	Código IATA	A 3-letter identifier assigned by IATA that uniquely identifies an airport (e.g., LIS, OPO).
Maintenance Component	Componente de Manutenção	The aircraft subsystem targeted by a maintenance activity, categorised as Engine, Airframe, etc.
Maintenance Interval	Intervalo de Manutenção	The defined thresholds (flight hours or calendar days) in a template that trigger scheduled maintenance alerts.
Maintenance Part	Peça de Manutenção	An inventory item used during aircraft maintenance, managed by the Maintenance Supervisor.
Maintenance Record	Registo de Manutenção	A record documenting a maintenance activity performed on a specific aircraft, based on a template.
Maintenance Template	Modelo de Manutenção	A reusable template defining the type, checklist, and scope of a maintenance activity for an aircraft model.
Manufacturing Date	Data de Fabrico	The date on which a specific aircraft was manufactured.
Model Designation	Designação do Modelo	The manufacturer and commercial model name that identifies an Aircraft Model (e.g., Boeing 737).
Model Specifications	Especificações do Modelo	Technical parameters of an Aircraft Model: base seating capacity, fuel capacity, maximum range, cruising speed.
Network	Rede	The comprehensive set of active flight routes operated by the company.
Part Number	Número da Peça	The unique identifier for a specific Maintenance Part in the inventory.

TEA (EN)	TEA (PT)	Description (EN)
Record Details	Detalhes do Registo	Core information of a Maintenance Record: description, start date, and expected duration.
Region	Região	A broad geographical zone (e.g., Europe, North America) used to group airports, larger than a country.
Registration Number	Número de Registo	A unique alphanumeric code that identifies a specific aircraft (e.g., CS-TKY).
Route Distance	Distância da Rota	The total fixed distance between the origin and destination airports of a route.
Route ID	ID da Rota	Unique system-generated identifier assigned to a Flight Route.
Route Requirements	Requisitos da Rota	Minimum aircraft capabilities required to operate a route: minimum range and minimum seating capacity.
Runway	Pista	A designated landing and take-off strip at an airport, characterised by name, length, and orientation.
Scheduled Flight	Voo Agendado	A planned flight instance combining a Flight Route, an Aircraft, and a specific Flight Schedule.
Seating Capacity	Capacidade de Lugares	The specific number of passenger seats for an individual Aircraft instance, which may vary from the base model.
Stock Level	Nível de Stock	The current quantity of a Maintenance Part in inventory and its minimum threshold for low-stock alerts.
Template Name	Nome do Modelo	Unique name that identifies a Maintenance Template within the system.
Template Type	Tipo de Modelo de Manutenção	Category of maintenance activity defined in a template: Inspection, Overhaul, etc.
Value Object	Objeto de Valor	An immutable domain object defined solely by its attributes, with no identity of its own.
